The Most Accurate Ignition System Money Can Buy!

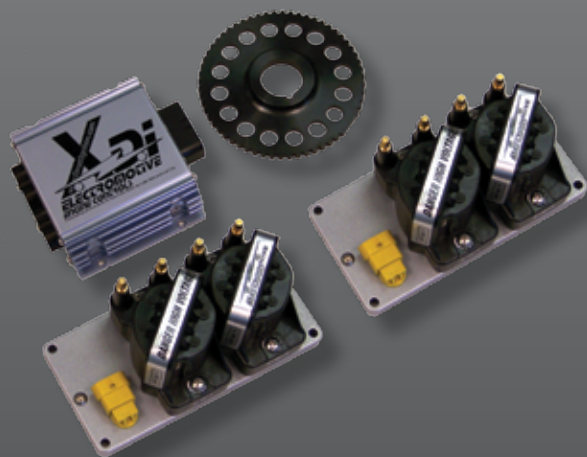

XDI

Electromotive builds the ultimate ignition system for just about every type of performance and racing engine.

XDI IGNITION SYSTEM

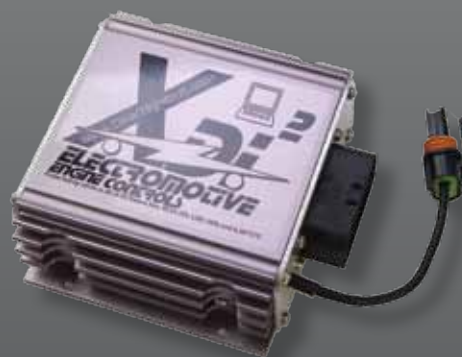

If your current ignition is making you see red, solve those age old ignition problems with our eXtreme Direct Ignition. Take back the power you are losing to your under performing ignition with superior technology. The XDi's multi-coil setup combined with its unique coil charge routine provides better spark power per cylinder than any other multi-coil system, distributor or magneto.

- The XDi's knob based controls make setup quick and easy
- Over 60° of Spark Duration will eliminates upper RPM misfires caused by short duration CDI spark
- Timing accuracy to within 1/8° optimizes engine performance and reduces engine wear
- No moving parts to wear out and cause premature failure
- Completely eliminates rotor-phasing issues
- MAP sensor input for vacuum advance and boost retard
- Additional features can be added with custom modules

XDI² IGNITION SYSTEM

The XDI² steps in when the simplicity of the XDi's knob adjustment simply cannot provide the type of control demanded by some racers. Fully programmable using Electromotive's new WinTEC4 software, the XDI² provides all the fine-tuning demanded by racers looking for every ounce of performance from their engine.

- 3D timing tables for creating the perfect timing curve for any engine
- Programmable general purpose inputs and outputs
- Programmable launch control
- Programmable down track boost control
- Programmable knock sensor input
- Programmable staging limiter
- Shift Cut feature for sequential gearboxes
